

Energy Medicine Practitioner

Energy Medicine is the wave of the future in Healing. It has been known to help heal the body on a cellular level. We use this acclaimed effective healing technology. The Tesla & Dr. Rife's PEMF device technology is already FDA approved for bone fractures and tissue swelling, however, it can also effectively address many other areas of the body's health disturbed tissues.

The PEMF device is declared by many to recharge the user's cellular voltage. It is known to help get oxygen and nutrients into the body's cells and to help get toxins out. It has been acclaimed by many worldwide to accelerate their healing. It is reported to do this by energizing the cells and cleaning up each cell's efficiency. The TeslasPEMF device we use is called ELECTRO PEMF THERAPY. You can watch videos for further knowledge of this protocol at TeslasPEMF.com. We are **"voltage regulated"** not chemically regulated. The critical understanding is to know that people are mostly made of energy and are not just a chemical and biological assembly. Our bodies are mostly bio-magnetically assembled and are living beings which are always vibrating. Everything that exists has its own frequency. Our bodies have a unique and adjusting frequency. Necessary to this is to understand that we are no longer getting the full natural 7.8 hz to 10 hz gravitational field from earth as we are so often spending 90% of our time indoors.

The critical Electro PEMF therapy has been around for a long time. World famous scientists, Dr. Raymond Rife and Nikola Tesla understood this, and created these PEMF devices to help our

bodies heal themselves. This energy system cleans the cells and helps them to function again as they did when we were a stronger healthier 20 year old.

We have 30 to 100 trillion cells in our body. This PEMF treatment stimulates the mitochondria and is reported to help create additional numbers of the body's healthy stem cells. Cells that can not operate with energy are often the cause of degenerative diseases. We need to energize and shake the cells to clean them and help them remove the damaging toxins. Then healthier energized cells, birthing up to 25 million new cells per hour, can create more stem cells and can improve greater healing potential. When our cells are strong and can more efficiently take in sodium and potassium nutrition and more easily extrude damaging toxins, then they can free us from the many cell damaging and disabling problems which are often health disasters

People using the PEMF device are now declaring that they have increased their body's energy, provided better circulation, improved sleep, improved muscle circulation and performance, decreased inflammation and swelling, improved oxygenation in tissue, enhanced cellular repair and recovery, improved immune system, reduced depression, and reduced pain. The PEMF treatment uses safe low energy and low intensity pulses. After introducing this exact pulsing frequency of low energy directly into key areas of the body, (*energy only 1/1,000 the strength of the energy that a cell phone radiates into the body*) then the PEMF system is able to revitalize the exact cells needing the most attention sooner for a more energized and cleaner life cycle.

This device uniquely creates over 2,500 exact health directed frequencies including: cardiovascular, gastrointestinal, organ function, bone health, vitamins, minerals, circulatory system, body toxins, allergies, heavy metals, fatty acids, and meridians. You put your hand on an energy collection sensor for one minute, then that device employs the Chinese hand acupuncture system to analyze the body, not a diagnosis, and produces an education only report. This educational report is transferred to a 100 to 120 page database, and is swift and non-invasive and importantly does not even need to draw any blood. It almost instantly provides a comprehensive education only health indications report including a further explanation of each of the body's over 50 separate areas. This report of the possible condition of the body's various body parts and tissues is the important path to know so that you may then use the TeslaPEMF frequency system more effectively.

You can take these results to your doctor so he or she can verify the potential health concerns and discuss further possible additional attention which may be due.
