

What is PEMF therapy?

PEMF (Pulsed Electromagnetic Field) therapy is a device which emits safe, very low electromagnetic signals at different frequencies in order to stimulate and encourage the body's natural healing process. TeslaPEMF uses the Two Coil System (Bio-Electro-Magnetic-Energy-Regulation) device, in an FDA approved PEMF technology system. (FDA has approved the PEMF Technology in 11 medical case usages as safe and effective. Including Brain Cancer, Bone Healing etc.)
